Ukrainian - native
Russian - native
English - B1

I am a 4th year student at NUBP, I have been studying front-end development for about 4 years. Use React to create web applications. I have experience in completing freelance projects.

In 2020, my frontend journey began with HTML, CSS, and JavaScript. Today, armed with frameworks and libraries, I craft dynamic web applications. From basics to complexities, my path is one of continuous growth.

TECH STACK

Frontend Technologies

- JavaScript
- TypeScript
- React JS
- Redux/toolkit
- Axios
- REST API

Layout

- HTML5
- Adaptive layout
- BEM

Styling

- CSS
- SASS/SCSS
- Tailwind/Bootstrap
- CSS-IN-JS

Backend Technologies

- Node.js
- Express.js

PROJECTS

ISATRADE
react, scss, react-router-dom, axios, telegram api

- code: https://github.com/vlad-burthev/isaTrade
- deploy: https://vlad-burthev.github.io/isaTrade/

In this project, I developed the isaTrade web application myself. Used React for creating UI and Redux for state management. Created interface components, configured routing and API integration. Additionally, I implemented sending orders to Telegram.

ISPEAK
react, scss, axios, telegram api

- code: https://github.com/vlad-burthev/ispeak/
- deploy: https://vlad-burthev.github.io/ispeak/

In this project, I independently developed the iSpeak landing page. Used React to create the user interface and added form submission to telegram

EDUCATION

SPECIALTY: 121 "SOFTWARE ENGINEERING"

National University of Life and Environmental sciences of Ukraine

BACHELOR | 19.09.2022 - 30.06.2025

SPECIALTY: 121 "SOFTWARE ENGINEERING" DIPLOMA OF JUNIOR SPECIALIST

Mykolaiv Polytechnic Vocational College

JUNIOR SPECIALIST| 19.09.2018 - 30.06.2022

INTERSHIP DEVELOPER

UNICORN SYSTEMS UA

INTERSHIP DVELOPER| 01.07.2024 - 05.07.2022
